SUSTAINABLE WA

Sustainable WA — Watch List Pesticide Use Justification Form (Requirement 8-2)

This form documents why a Watch List material was used and what was done to reduce risk. It is not a request for permission and it does not create an exemption.

Use one form for each Watch List product/active ingredient used per certification year.
If you used more than one Watch List material, complete a separate form for each one.
Scoring summary (Requirement 8-2):

- Score Level 3: Complete Sections A, B, and C below.
- Score Level 4: Complete Sections A, B, C, and D

Boron nutrition clarification: If boric acid / borate salts / borax are used strictly as foliar boron nutrition, a Watch List justification form is not required (unless used for pesticidal purposes).

Sustainable WA evaluates Watch List/Prohibited status based on active ingredient and EPA Reg. No. (not trade name alone).

Operation and product identification (required for all forms)

Grower / Company Name: _____ **Year:** _____

Vineyard / Operation Name (if different): _____

Material Trade Name (as on label): _____

EPA Registration #: _____
*Trade/brand names are not unique; always include the EPA Reg. No. from the container label to ensure the correct formulation/label is reviewed.

Active Ingredient(s): _____

Application Date(s): _____

Block(s) where used (list all): _____

_____

_____

_____

_____

SUSTAINABLE WA

A) Problem, Monitoring, and Trigger (Required for Level 3 and Level 4)

Describe the issue being addressed and what monitoring/thresholds led to treatment.
Include scouting notes, observed pressure, timing, and what triggered action.

Response:

B) Justification for Use (Required for Level 3 and Level 4)

Explain why this Watch List material was necessary this season for this situation/site.
Include key constraints (efficacy, timing, resistance management, labor/equipment limitations, weather, etc.).

Response:

SUSTAINABLE WA

C) Risk Mitigation Actions Taken (Required for Level 3 and Level 4)

List the actions taken to reduce environmental and worker risk. Check all that apply and add details.

Mitigation actions (check and describe):

- ☐ PPE and handler protections used per label; training verified
- ☐ Drift reduction steps (nozzles, pressure, droplet size, wind limits)
- ☐ Buffers / setbacks / sensitive-area protections used
- ☐ Rate minimized within label allowances
- ☐ Timing adjusted to reduce risk (weather, bloom, pollinator windows, etc.)
- ☐ Spot treatment / targeted application (vs broad application)
- ☐ Other: _____

Details:

D) Alternatives and Improvement Actions (Required only for Level 4)

To qualify for Score Level 4, complete both D1 and D2.

D1) Alternatives attempted or evaluated and outcomes

List alternatives that were attempted and results, or evaluated and why they were not viable this season (be specific).

Response:

D2) Plan to reduce reliance going forward

What will be done before next season to reduce reliance on this Watch List material (trial plan, cultural controls, equipment, timing, products, thresholds, etc.)?

Response:

Signature and recordkeeping

To be signed by the Sustainable WA Program Contact/Vineyard Operations Manager:

I certify that this form is accurate and will be retained for audit.
